

Parents,

Medically fragile children are more likely to catch common childhood illnesses. In addition to catching illnesses easily, medically fragile children often become life threatening ill when the typical child will recover with little to no difficulty. Please help us keep our classroom safe for all children.

As with all students, we encourage parents to keep sick children home. We will be washing materials, wiping down surfaces, and washing our hands regularly. Together we can make our classroom a great place for all students to work hard, stay kind and keep safe.

Thank you

Mrs. Hudson
